KEY ACHIEVEMENTS

- Promoted to Director of AI after leading automation, analytics, and AI modernization initiatives
- Leading transition from legacy on-premise reporting to Azure-based cloud analytics infrastructure
- Reduced financial close reporting effort by 50% through automation and dashboard standardization
- Built executive KPI dashboards and self-service reporting across finance, operations, and plant leadership
- Managed forecasting and P&L analysis for \$20M+ monthly revenue streams
- Designed NPV/IRR CAPEX model supporting \$30M in spend prioritization
- Driving AI adoption through proprietary tools, automated alerts, and governed analytics workflows

EDUCATION

M.S. in Analytics, Georgia Institute of Technology ('29)

M.S. in Business Analytics, Cornell SC Johnson College of Business ('26)

B.A. Economics & Statistics, University of Vermont ('21)

AI-Enabled Alerting Systems
Cloud Data Migration

Data & Analytics

Power BI
SQL
Python
R
Tableau

ERP & Finance Systems

SAP FICO
IBM TM1
E2 ERP
Crystal Reports
Financial Reporting Automation

WORK EXPERIENCE

Director of AI

The Rubber Group

Laconia, NH | 2026–Present

- Lead enterprise AI, data infrastructure, and Azure cloud modernization strategy for a PE-backed manufacturing business.
- Drive migration from legacy remote-desktop/on-premise SQL reporting toward a scalable Azure analytics environment supporting finance, operations, sales, and plant leadership.
- Design governed ERP-to-cloud reporting architecture across E2, SQL, Power BI, and Azure, improving data reliability, refresh logic, metric definitions, and executive visibility.
- Build proprietary AI-enabled tools and alerting systems to surface margin risk, operational exceptions, reporting gaps, and business issues before they escalate.
- Partner directly with executives, private equity stakeholders, plant leadership, and IT vendors to define the AI roadmap and prioritize high-value automation opportunities.
- Transform manual spreadsheet reporting into cloud-based dashboards, reusable models, and self-service analytics for COGS, labor, absorption, throughput, pricing, mix, and forecast variance analysis.

STRATEGIC & BUSINESS ADVISOR —

FinOps / Analytics Tooling

Politheon (Georgia Tech CreateX Startup)

Atlanta, GA, 2025 – Present

- Partner with founders and engineering to define FinOps strategy for AI infrastructure, aligning Azure/GPU consumption with budget, margin, and growth targets.
- Built cost-visibility dashboards + unit-economics models (workload / feature / customer segment) that translate usage into pricing, ROI, and roadmap tradeoffs.
- Implemented tagging standards, budget guardrails, and right-sizing recommendations to improve cost attribution and governance while maintaining model performance and scalability.
- Supported product/growth strategy contributing to recognition as #2 featured startup at Georgia Tech CreateX showcase.
